Email - mithunsurya1313@gmail.com
Phone No - 8778785675
Coimbatore, TN

Executive Summary

Computer Science student with strong skills in Python automation and statistical modeling. Experienced in building data pipelines that transform complex datasets into clear, predictive insights. Proficient in Pandas, NumPy, and Scikit-Learn for data analysis, along with React for creating interactive dashboards. Passionate about using technology to improve financial forecasting and operational efficiency.

Technical Skills

- Programming Languages: Python, C, C++
- Web Technologies: HTML, CSS, Java Script
- Libraries and Frameworks: React, Bootstrap, Pandas, Numpy
- Tools & Software: Git, Visual Studio Code
- Databases: MySQL, Oracle, MongoDB
- AI/ML Technologies: scikit-learn

Soft Skills

- Communication & Teamwork
- Problem Solving
- Time Management
- Adaptability

Projects

1. Fragment Flow (Chrome Extension)

- **Overview:** Developed a high-performance download manager extension for Google Chrome designed to optimize data transfer speeds.
- **Mechanism:** Engineered logic to segment incoming files into smaller data fragments, downloading them simultaneously through multiple threads to bypass standard single-stream limitations.

2. Credit Risk Decision Engine

- **Overview:** Built a data-driven analytics engine to automate the assessment of creditworthiness using fintech datasets.
- **Data Strategy:** Performed extensive data cleaning and feature engineering in **Python** to prepare raw financial data for machine learning training.
- **Deployment:** Hosted the final project on **GitHub**, demonstrating an end-to-end workflow from raw data ingestion to predictive risk scoring.

3. Dual Arena Game

- **Overview:** Developed a competitive arena game in **Unity** focusing on advanced rendering techniques.
- **Shaders:** Authored custom visual effects using **ShaderLab** and **C#** to create unique environmental lighting and arena-based mechanics.
- **Logic:** Implemented real-time game state management and player interactions within a high-performance rendering environment.

4. Cfake: AI vs. Real Image Classifier

- **Project Type:** A streamlined image forgery detection tool designed to classify images as either AI-generated or authentic.
- **Workflow:** Developed a clean, end-to-end pipeline that takes a raw image input and outputs a probability score, effectively identifying synthetic artifacts that are often invisible to the human eye.

5. Interactive Graph Visualization Tool

- **Overview:** Created a graphical application for the real-time visualization of classic graph theory algorithms.
- **Functionality:** Developed an interactive interface using **Pygame** and **NetworkX** that allows users to manually build graph structures and observe the step-by-step execution of algorithms like Dijkstra, BFS, and DFS.
- **Purpose:** Designed to bridge the gap between theoretical algorithm logic and practical visual behaviour in complex network structures.

Education

M.Sc. Data Science	2024 – 2029
PSG College of Technology, Coimbatore.	CGPA – 8.36
XII (Higher Secondary, State Board)	2024
St. Joseph's Matriculation Higher Secondary School, Coimbatore.	91.6 %

Awards & Accomplishments:

1. Solved 200+ problems in Leetcode.
2. Certified in Full Stack Development (Master Class) – Novitech, Coimbatore.
3. Python(Basic) Certificate | HackerRank.
4. Elected as a Class Representative to manage academic operations and communication for a cohort of 40 students, acting as the primary liaison between the student body and faculty to resolve departmental bottlenecks.
5. Runner, Infinity (Intra-College Technical Competition) – 2026.
